

Tulare County Workforce Investment Board, Inc.

★ *Business Services* ★

Business owners and managers need quick, accurate answers to their questions.

We believe that if we are able to provide them with the answers they seek then we will be able to have a direct impact on their overall performance & profitability – thus averting any potential layoffs or closures.

In keeping with that philosophy, we created our Business Resource Centers to provide a full range of services to the business community in Tulare County. Specifically designed to meet the needs of local businesses, the centers are equipped with a resource library, interview rooms, training facilities, and computer access.

Each Center is staffed by one of our Business Resource Specialists. They work closely with our “business partners” to assist businesses with their needs. We have grouped our services into five themes and we work with the partner(s) noted to respond to the needs of our local businesses.

Hiring & Training

The Employment Connection is Tulare County's employment & training system. It allows us to bring together a myriad of partner agencies and services to assist job seekers & the business community.

Financial Assistance

A variety of financing programs are available to businesses. The Business Finance Center allows us to leverage all of the lending sources in an effort to meet the financial needs expressed by businesses.

Technical Assistance

All businesses can use outside assistance at some point. The Small Business Development Center helps us provide practical information and guidance that business owners can use to establish goals and achieve success.

Incentive Zones

Tax credits and other incentives are available to some businesses operating within our state and federally designated zones. The Incentive Zones encourage business development and allow us to assist eligible businesses.

Local Services

We believe that a truly “business friendly” community helps a company go about its business in the most efficient manner. Therefore, we actively promote the resources that have been created by our cities & county to assist business.
